<b>Target Audience:</b>	All 3 - 12 educators and school technology coordinators, who want to support students by exploring the world with cutting edge technology.
<b>Description:</b>	Experience the ultimate introductory level GPS hands-on workshop for educators. This class is for all 3—12 educators who wish to learn what GPS is and how to use it as a tool with their students in the classroom. Teachers will learn what GPS is, how to work with a GPS unit, initialize it, program it, collect data, enter data, clear data and how it is used in the real world and why it is important in education. The unique twist to this class will be the use of ecocache sites that let you experience a museum without walls in action – its landscapes, its formations, its geology or the visible features that have an ancient story to tell. Also learn how ecocaches can be used to explore, learn and teach about your community and other local features.
